

# Apple TV 3rd Generation Snap-on Base Replacement

How to easily replace this important part on you device

Written By: Vincent Monteil

## INTRODUCTION

For many electrical reasons, the Apple TV base is plastic made and can be incidentally damaged. I think important to tell you how to easily replace this part.

---

### TOOLS:

- [Metal Spudger Set](#) (1)
-

## Step 1 — Snap-on Base

- As the device base is firmly clipped, insert two metal spudgers to gently release the first clips.

## Step 2

- Continue releasing the last plastic clips with your hands caring not to broke any of the plastic elements attached to the base.

To reassemble your device, follow these instructions in reverse order.
